

#1254: SimLab – Symmetry Mesh

Product: SimLab

Product Version: SimLab 12.0 or above

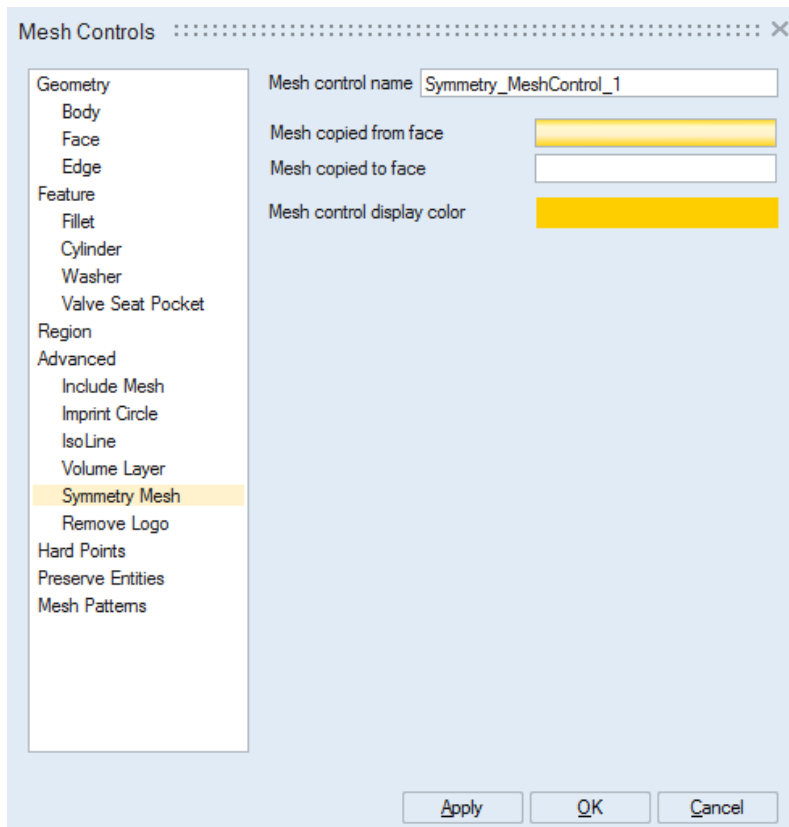

Topic Objective

Symmetry mesh in SimLab

Topic Details

This option is used to get identical mesh between the master face and symmetry face. If there are any discontinuous edges, then we need to pick three nodes/vertices in an order for both master and symmetry face.

Mesh > Mesh Controls > Advanced > Symmetry Mesh

Symmetry mesh is applied to the highlighted faces, such that the mesh from Face A is to be copied to the Face B. An edge mesh control is also applied along Face A to clearly show that the mesh in both the faces are identical.
