

#1257: HyperView – Exporting a Deformed Shape

Product: HyperView

Product Version: HyperView 12.0 or above

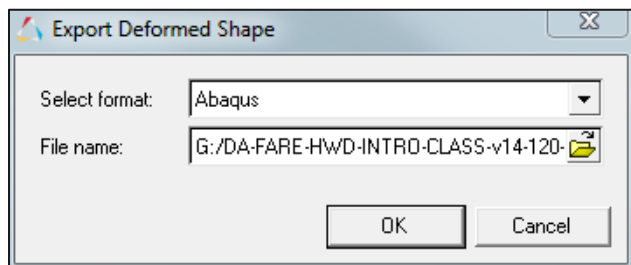

Topic Objective

Export deformed shape in HyperView

Topic Details

Export Deformed Shape Tool - allows you to export the deformed shape

File > Export > Solver Deck from menu bar > **Export Deformed Shape** dialog box

Solver Decks Supported

Abaqus, DynaKey, OptiStruct Analysis /Nastran, RADIOSS & STL

Exports unscaled coordinates

If scaled coordinates are needed, use **Linear Superposition** utility to create subcase and then use this utility (with scaled coordinates).
