

#1276: HyperMesh – Model Tour

Product: HyperMesh

Product Version: HyperMesh 13.0 or above

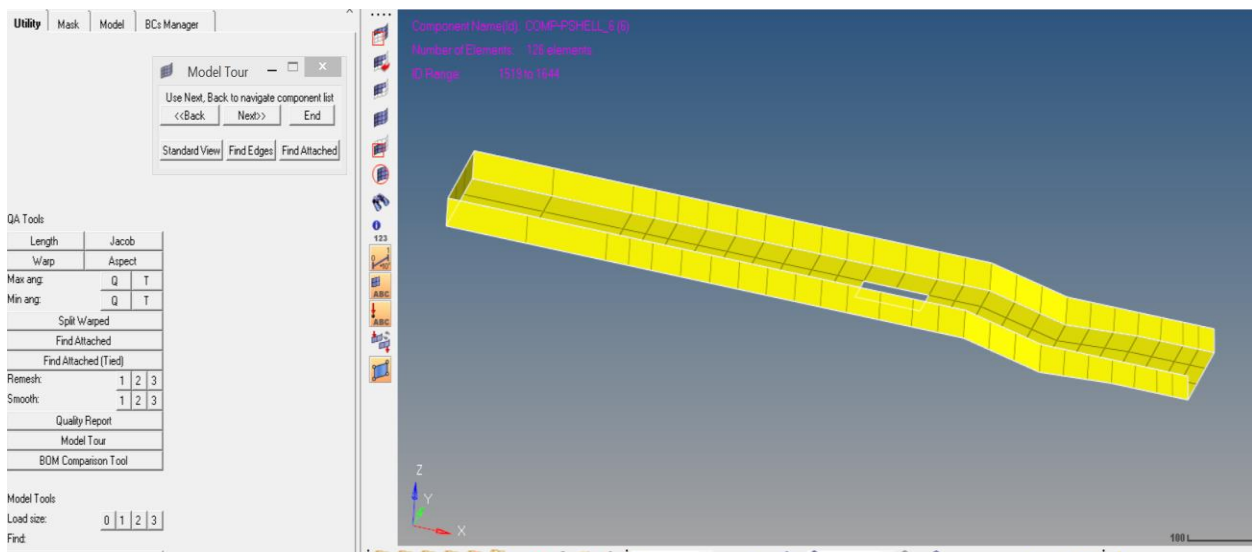

Topic Objective

Model tour in HyperMesh.

Topic Details

The Model Tour option can be used to review the selected components individually. It displays the component name, number of elements in that component and their ID range. It also displays a dialog from which you can review the free edges of the component and any elements attached to the component.

- 1). This option can be accessed from **Utility Menu>QA/Model>Model Tour**
- 2). Select the components in the model for reviewing.

3). By clicking Next, it will navigate to the next component and will display the component name, number of elements in that component and their ID range.

4). The free edges of the component and any elements attached to the component can also be reviewed.
